

Additional AAX features

Background processing
callback

```
graph RL; A[Background processing callback] --> B[Additional AAX features];
```

The diagram consists of two rectangular boxes connected by a horizontal arrow. The box on the right is gray and contains the text 'Background processing callback'. The box on the left is white with a black border and contains the text 'Additional AAX features'. A black arrow points from the right box to the left box, indicating a flow or relationship from the background processing callback to the additional AAX features.
